HUNTSVILLE, Ala.--(BUSINESS WIRE)--June 30, 1998--ADTRAN, Inc. (NASDAQ: ADTN), a leader in transmission products for high-speed digital communications (www.adtran.com), announced today the release of the latest additions to its popular Total Reach ISDN products. Used to extend ISDN without costly repeaters, Total Reach ISDN second generation products accommodate several new form factors.

ADTRAN's second generation Total Reach ISDN Central Office units are available in industry standard T400 and D4 form factors as well as ADTRAN's popular BR1/10 form factor. The remote units are available in environmentally hardened housings from Siecor, KepTel, and TII.

The second generation Total Reach ISDN products operate at lower span powering voltages and continue to meet the Bellcore GR1089-CORE Class A2 power rating. While consuming less power, these products provide the same exceptional performance as the first generation product line.

Total Reach ISDN uses ADTRAN's Simple Coded-Pulse Amplitude Modulation (SC-PAM) technology to deliver basic-rate ISDN service up to 30,500 feet from a central office using just a single twisted pair cable. SC-PAM is spectrally compatible and can share a binder group with existing services, such as DDS, HDSL, ADSL and T1/E1.

Established in 1985, ADTRAN is a leading provider of total system solutions for delivering today's digital transmission technologies over existing telecommunications infrastructures. The company is best-known for developing cost-effective, high-performance equipment that transforms copper wire local loops into high-speed digital networks. The ISO 9001 company is a top supplier of DDS, ISDN, Frame Relay, T1/FT1 and HDSL products. ADTRAN customers include the Regional Bell Operating Companies (RBOCs) and many of the more than 1,300 independent Telcos in the United States. ADTRAN also designs and manufactures products for private end-users in the customer premise equipment (CPE) market. For more information, contact the company at 800/326-3700 or via email at info@adtran.com. On the web, go to www.adtran.com.
