The New York Stock Exchange reported yesterday that short interest soared 14.9 percent, or 39.1 million shares, in the month ended Dec. 13, to a record 301.9 million shares. The previous high of 262.8 million shares was set last month. The short interest for the period a year earlier was 220.7 million shares.

In the same period, the short interest on the American Stock Exchange rose to a high of 23.5 million shares, up 3.8 million from last month. The previous high of 22.9 million shares was set in October.

A short position can result from the sale of borrowed stock in the hope of buying the same issue at a later date and at a lower price to cover the sale.

The following Big Board companies show large changes:
