The tables highlight companies showing the largest percentage change in insider holdings for the past six months. They reflect the holdings of the insiders indicated, not the entire company. The tables do not include pension-plan or employee stock-option activity, trades by beneficial owners of 10% or more, trades under \$2 per share or trades under 100 shares. The "Purchases" column includes only open-market and private purchases; the "Sale s" column includes only open-market and private sales, and excludes trades preceded by option exercise in the 15 days prior to the reported event.

*Indicates a filing that is over three days late. An L in the % Change in Holdings column signifies a move of less than one percent.
