Total Access 1250 DSLAM Provides Space-Efficient, Versatile Solution For DSL Delivery Services.

HUNTSVILLE, Ala.-(BUSINESS WIRE)-June 2, 2003-ADTRAN (TM), Inc. (NASDAQ:ADTN), The Network Access Company and leading provider of telecommunications equipment, today announces the addition of an IP DSLAM to the Total Access 1200 family. The first in the series of IP interface modules provides a 10/100BaseT Ethernet network connection that will enable applications where ATM is not available in the network. The Total Access 1200 family of 1U high Mini-DSLAMs each delivers 24 ports of ADSL with integrated POTS splitters. The feature set has now been expanded with the addition of IP connectivity for remote applications.

"We are pleased to offer IP service uplinks to ILECs, CLECs, and Independents in a Mini-DSLAM that saves remote terminal space while increasing delivery options," states P. Steven Locke, vice president, marketing, of ADTRAN Carrier Networks Division. "The ability to hand off IP toward the network via an Ethernet port opens many new application opportunities for carriers. It improves their ability to deliver services that are in demand for enterprises where IP connectivity has been a problem."

The ability to connect to the Total Access 1250 via an IP uplink at the customer premises immediately improves the economics of broadband for businesses such as hotels, service-based organizations, and small-to-mid-sized enterprises (SME). Carriers benefit by expanding IP in their existing networks without costly ATM server installations. This is especially true for network applications that don't require the expense associated with ATM-QoS. In these cases, IP is more ubiquitous and cost-efficient for both intra-and inter-network operations.

**About ADTRAN**

ADTRAN, Inc. is one of the world's most successful telecom equipment suppliers, with a 17-year history of profitability and a portfolio of more than 1,000 solutions for use in the last mile of today's telecommunications networks. Widely deployed by both carriers and enterprises alike, ADTRAN solutions enable voice, data, video, and Internet communications across copper, fiber, and wireless network infrastructures. ADTRAN solutions are currently in use by every major domestic service provider and many international ones, as well as by thousands of public, private and government organizations worldwide.

ADTRAN products are RUS accepted and feature a five or ten-year warranty on every product. For more information, contact the company at 800 9ADTRAN (800 923-8726) or via email at [info@adtran.com](mailto:info@adtran.com). On the web, visit [www.adtran.com](http://www.adtran.com).
