The New York Stock Exchange reported yesterday that short interest rose 6.4 million shares, or 1.7 percent, in the month ended Aug. 15, to a record 374.9 million shares. The previous high of 368.6 million shares was set July 15. The short interest for the period a year earlier was 248.6 million shares.

In the same period, the short interest on the American Stock Exchange fell 4.5 million shares, to a total 32.7 million shares. The high of 38.3 million shares was set in July.

A short position can result from the sale of borrowed stock in the hope of buying the same issue at a later date and at a lower price to cover the sale.
